Marie Curie short term training fellowships:

***ADVANCED TRAINING PROGRAMME IN  
BACTERIAL CELL BIOLOGY***

For the academic year 2009/2010 there are still a few short term (3 to 6 months) training fellowships available. These fellowships are for students who have finished their Masters degree or PhD students or postdocs who would like to gain more experience in bacterial cell biology. The fellowships are generously funded (~ £1500 - £2000 / month) and the research will take place in the new Centre for Bacterial Cell Biology, Newcastle, UK.
